LEARN BY DOING

## **WELCOME TO NORTH SHORE DENTAL ASSISTING ACADEMY, WHERE YOU WILL LEARN BY DOING**

**Admission is open to qualified applicants. No qualified person may be excluded from enrollment in the North Shore Dental Assisting Academy Program based on age, race, or gender.**

The Bureau of Labor Statistics predicts that dental assisting will be the third fastest growing occupation for which a degree is not required. Dental Assistants are a vital part of the dental team. They assist dentists with examinations and treatments, ease patient's anxieties, schedule appointments, and more. Dental Assisting is a respectable profession and dentistry is an exciting field to be a part of.

Dental assistant jobs are expected to increase 23% by 2024. There will be a shortage of dental assistants to fill the many jobs that will be available. The demand for dental assistants is expected to surpass other supporting healthcare professionals.

Dental Assistants can work in hospitals, dental clinics, private practices, dental schools, and public health services departments. Many choose the dental assisting program as a stepping stone to a Dental Hygiene Program, and even Dental School.

The mission of the academy is to provide the necessary skills and knowledge to individuals interested in pursuing a post-secondary education in the field of dentistry. It's our mission to prepare the dental assisting student to become a critical and intricate part of a dental office.

## **PROGRAM GOALS**

We strive to make you a vital part of the dental team. Our program goals are:

- 1) To prepare the dental assisting student to become a critical thinking healthcare professional who promotes oral healthcare effectively.
- 2) To create learning opportunities for students to qualify for examination and certification as a certified dental assistant.
- 3) To ensure students receive accurate information, guidance, and advisement to obtain optimal direction for their educational pursuit in the dental assisting field and beyond.

## **COURSE DESCRIPTION**

The dental assisting course is a 10 week program that prepares students to enter the profession of dental assisting. During the 10 week course students receive an in-depth instructional, and hands on education in many aspects of dentistry including clinical procedures, dental materials, radiology, and more. These skills allow the student to be immediately employable upon successfully completing the program. These skills will also prepare the graduate to take the state certification exam. We will provide access to quality dental assisting education through the use of scientific evidence based instruction and technology that meets current industry standards by faculty who act as mentors and professional role models. The curriculum also includes a broad overview of front desk duties, and effective communication. The facility is a working dental office with the latest equipment, technology, lab, and sterilization area. From the first day of class, students experience what it is like to work in a real dental office.

# **CURRICULUM**

## **Introduction to Dental Assisting**

The student will be introduced to the dental health care team learning the responsibilities of each member. Instruction will include how to prepare the patient for care, including how to record patient information on the computer. Instruction will be given on infection control, and sterilization. The student will have the ability to identify members of the dental team, and understand the roll of the assistant. The student will also have the ability to properly communicate with the patient through communication etiquette instruction.

## **Oral Anatomy**

The student will be instructed on the location, structure, function, and surfaces of teeth. The student will have the knowledge, and ability to identify teeth by name, location, and explain the function of specific teeth.

## **Radiology**

Instruction will be provided in the history and biological effects of radiation, and safety precautions of digital x-rays. Students will receive the necessary training and technique information needed to take diagnostically acceptable intraoral and extra oral x-rays. The student will have the knowledge, and skill set to obtain acceptable x-rays, and recognize and correct errors on dental x-rays.

## **Chairside Assisting**

Instruction will address four handed dentistry, instrument identification, set up, use, grasps, transfer, and procedures. The student will develop the skill set to demonstrate proper exchange

of dental instruments using four handed dentistry techniques to assist the dentist in general procedures such as fillings, crowns, oral surgery, endodontics, orthodontics, and periodontics. The student will also have the ability to set up procedure trays with the proper instruments.

### **Dental Materials**

The student will be instructed on the many different types, and uses of dental materials in general, and specialty procedures. The student will have the knowledge and skill set to properly demonstrate material set up and usage in all procedures.

## **WHAT SETS US APART**

- 1) The course is taught in a state of the art working dental office
- 2) Dental materials and supplies that are used in actual dental procedures are provided
- 3) Use of real equipment and instrumentation
- 4) Instruction delivered by highly trained dental professionals
- 5) Small classes
- 6) Hands-on curriculum
- 7) Extensive instruction in chairside assisting, four-handed dentistry, radiology, restorative materials and procedures, laboratory materials and techniques, infection control, sterilization, dental specialties, and communication.
- 8) **Classes begin every 11 weeks**
- 9) **Affordable Tuition**
